CGPA: 9.8

WORK EXPERIENCE

Intern – Full Stack Developer | Mobiloitte Technologies Pvt. Ltd. (New Delhi)

Sep 2025 – Present (On-site)

- Worked on backend and frontend modules as part of enterprise training projects
- Implemented REST APIs and integrated them with frontend components
- Developed ticketing and form-based systems using JavaScript and backend services
- Implemented Role-Based Access Control (RBAC) for different user roles in the admin panel
- Used GitLab for version control and followed structured development workflows.

Intern - Software Development | Marvell Digital Technologies Pvt. Ltd.

07/2025 – 09/2025 (Remote)

- Selected for a Software Development Internship.
- Enhanced skills in front-end and back-end technologies through practical tasks and mentorship.
- Collaborated remotely with the team using version control tools and communication platforms.

PROJECTS

Single Brand Garment Store (Training Project)

- Developed a chatbot-driven single-brand commerce system following a CPaaS-style architecture
- Designed admin panel functionality to manage products, pricing, and availability
- Implemented backend APIs to support chatbot flows such as product browsing, cart actions, and order intent
- Integrated chatbot interactions with backend services and database
- Focused on modular design, clean code, and backend-driven workflows.

RAG Chatbot (Full Stack Project)

- Built a full-stack RAG-based chatbot that generates context-aware responses from uploaded documents (PDF).
- Integrated OpenRouter API to deliver natural conversational answers.
- Developed the frontend using React.js with a dynamic chat interface and document upload functionality.
